

## Where Do NIMBioS Postdocs Go After Their Fellowship?

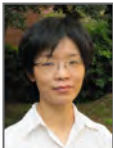

NIMBioS Postdoc	Project	Placement
 <p><b>Dr. Clemente Aguilar</b> Ph.D. Computational Science/Biology, Univ. Texas at El Paso</p>	<p>Prediction and rule inference of MHC class II epitope binder through logic minimization method</p>	<p>Postdoctoral Fellow, MD Andersen Cancer Center</p>
 <p><b>Dr. Folashade Augusto</b> Ph.D. Mathematical Sciences, Univ. of Ilorin, Nigeria</p>	<p>Mathematical analysis and optimal control of transmission dynamics of bovine tuberculosis</p>	<p>Assistant Professor, Department of Mathematics, Austin Peay State University; <b>Assistant Professor, Ecology &amp; Evolutionary Biology, University of Kansas</b></p>
 <p><b>Dr. Erol Akçay</b> Ph.D. Biology, Stanford Univ.</p>	<p>Coordination and negotiation in animal social behavior and interspecific mutualisms</p>	<p>Postdoctoral Fellow, Univ. of California Berkeley; Associate Research Scholar, Princeton University; <b>Assistant Professor, Biology, University of Pennsylvania</b></p>
 <p><b>Dr. Jeremy Beaulieu</b> Ph.D. Ecology &amp; Evolutionary Biology, Yale Univ.</p>	<p>Incorporating Hidden Markov models into ancestral state reconstruction methods</p>	<p>Postdoctoral Fellow, Department of Ecology and Evolutionary Biology, University of Tennessee; <b>Assistant Professor, Biological Sciences, University of Arkansas</b></p>
 <p><b>Dr. Sharon Bewick</b> Ph.D. Chemistry, Princeton University</p>	<p>Modeling local community responses to climatic change: A case study on the competitive and mutualistic interactions between ants and plants in temperate forests</p>	<p>Postdoctoral Fellow, Bill Fagan Lab, University of Maryland; <b>Postdoctoral Researcher and Lab Manager, Bill Fagan Lab, University of Maryland</b></p>
 <p><b>Dr. Juanjuan "JJ" Chai</b> Ph.D. Mathematics, Indiana Univ. Bloomington</p>	<p>Identifiability of statistical models and consistency of maximum parsimony in phylogenetics</p>	<p>Postdoctoral Fellow, Oak Ridge National Laboratory</p>

NIMBioS Postdoc	Project	Placement
 <p><b>Dr. Julia Earl</b> Ph.D. Biological Sciences, Univ. of Missouri</p>	<p>Using animal movement models to predict active subsidies</p>	<p>Postdoctoral Fellow, Department of Natural Resource Ecology and Management, Oklahoma State University; <b>Assistant Professor, Aquatic Ecology, Louisiana Tech University</b></p>
 <p><b>Dr. Caroline Farrior</b> Ph.D. Ecology &amp; Evolutionary Biology, Princeton</p>	<p>Rare disturbance events and their impact on evolutionarily stable strategies of forest trees in competition for light, water, and nutrients</p>	<p>Assistant Professor, Department of Integrative Biology, University of Texas at Austin</p>
 <p><b>Dr. Jake Ferguson</b> Ph.D. Biology, Univ. of Florida</p>	<p>Modeling the role of seasonality on ecological populations</p>	<p>Postdoctoral Fellow, Center for Modeling Complex Interactions, University of Idaho; Postdoctoral Researcher, Fisheries, Wildlife and Conservation Biology, University of Minnesota</p>
 <p><b>Dr. Orou Gaoue</b> Ph.D. Botany, University of Hawaii</p>	<p>Integrating new developments in stochastic demography to modeling the ecological impacts of non-timber forest products harvest</p>	<p>Assistant Professor, Department of Ecology, Evolution and Conservation Biology, University of Hawaii at Manoa; Assistant Professor, Ecology &amp; Evolutionary Biology, University of Tennessee, Knoxville</p>
 <p><b>Dr. Tucker Gilman</b> Ph.D. Zoology, Univ. Wisconsin</p>	<p>Modeling the evolution of speciation in coevolving systems</p>	<p>Lecturer, Department of Environmental Biology, University of Manchester, United Kingdom</p>
 <p><b>Dr. Will Godsoe</b> Ph.D. Biology, Univ. of Idaho</p>	<p>The statistical relationship between a species' niche and its distribution</p>	<p>Lecturer, School of Biological Sciences, University of Canterbury, New Zealand; Lecturer, Bio-Protection Centre, Lincoln University, New Zealand</p>
 <p><b>Dr. Sean Hoban</b> Ph.D. Biology, Univ. of Notre Dame</p>	<p>Developing simulation-based sampling guidelines for conserving the genetic resources of rare or economically important plant species</p>	<p>Tree Conservation Biologist, Morton Arboretum</p>

NIMBioS Postdoc	Project	Placement
 <p><b>Dr. Elizabeth Hobson</b> Ph.D. Biology, New Mexico State Univ.</p>	<p>The evolution of social complexity across taxa</p>	<p>Postdoctoral Fellow, Arizona State University-Santa Fe Institute's Center for Biosocial Complex Systems</p>
 <p><b>Dr. Amiyaal Ilany</b> Ph.D. Zoology, Tel Aviv Univ.</p>	<p>Modeling causes and consequences of temporal change in animal social networks.</p>	<p>Postdoctoral Researcher, Erol Akçay Lab, University of Pennsylvania; Senior Lecturer, Bar-Ilan University, Israel</p>
 <p><b>Dr. Tom Ingersoll</b> Ph.D. Environmental Science, Policy &amp; Management, UC Berkeley</p>	<p>Dispersal and dynamic occupancy models for the spread of white nose syndrome in bats</p>	<p>Computational Biologist, US Department of Defense</p>
 <p><b>Dr. Tony Jhwueng</b> Ph.D. Mathematics, Indiana Univ.</p>	<p>On optimal taxa sampling and modeling hybridizations for phylogenetic comparative methods</p>	<p>Assistant Professor, Department of Mathematics, University of Taichung, Taiwan</p>
 <p><b>Dr. Jiang Jiang</b> Ph.D. Biology, Univ. of Miami</p>	<p>Predicting and detecting consequences of storm surges on coastal vegetation regime shifts</p>	<p>Postdoctoral Fellow, Department of Ecology and Evolutionary Biology, University of Tennessee; Professor, Soil and Water Conservation, Nanjing Forestry University, China</p>
 <p><b>Dr. Nels Johnson</b> Ph.D. Statistics, Virginia Tech</p>	<p>Novel approaches for biodiversity, multiple species distributions, and community models</p>	<p>Mathematical Statistician, US Forest Service, Pacific Southwest Research Station</p>
 <p><b>Dr. Andrew Kanarek</b> Ph.D. Biology, Colorado State Univ.</p>	<p>An integrated theoretical analysis of the influence of individual trait variation on the dynamics and persistence of small populations</p>	<p>Population Biologist/Ecological Modeler, US Environmental Protection Agency</p>

NIMBioS Postdoc	Project	Placement
 <p><b>Dr. Sandy Kawano</b> Ph.D. Biology, Clemson Univ.</p>	<p>On the measurement of phenotypic selection: A quantitative synthesis</p>	<p>Marie Skłodowska-Curie Individual Research Fellow, Structure and Motion Lab, Royal Veterinary College, University College London; Assistant Professor of Comparative Physiology, California State University, Long Beach</p>
 <p><b>Dr. Arik Kershenbaum</b> Ph.D. Biology, Univ. of Haifa</p>	<p>Extracting contextual information from vocalization syntax in dolphins and whales</p>	<p>Herchel Smith Research Fellow, Department of Zoology, University of Cambridge</p>
 <p><b>Dr. A. Michelle Lawing</b> Ph.D. Geological Sciences and Biology, Indiana Univ.</p>	<p>Evolution of multivariate systems</p>	<p>Assistant Professor, Department of Ecosystem Science and Management, Texas A&amp;M University, College Station</p>
 <p><b>Dr. Maud Lélou</b> Ph.D. Ecology, Univ. of Reims Champagne-Ardennes</p>	<p>Mathematical modeling of the evolution of complex life cycles with application to <i>Toxoplasma gondii</i></p>	<p>Postdoctoral Fellow, Division of Epidemiology and Community Health, School of Public Health, University of Minnesota; Java Developer, AxYus, Paris, France</p>
 <p><b>Dr. Keenan Mack</b> Ph.D. Biology, Indiana Univ.</p>	<p>Modeling the dynamics of mutualism in populations structured by limited dispersal</p>	<p>Postdoctoral Fellow, University of Miami; Assistant Professor, Biology, Illinois College</p>
 <p><b>Dr. Gesham Magombedze</b> Ph.D. Applied Mathematics, National Univ. of Science &amp; Technology</p>	<p>Modeling the immunological host-pathogen interaction of Johne's disease to understand its pathology and treatment</p>	<p>Research Associate, Department of Infectious Disease Epidemiology, School of Public Health, Imperial College, London; Assistant Investigator, Baylor Institute for Immunology Research</p>

NIMBioS Postdoc	Project	Placement
 <p><b>Dr. Yi Mao</b> Ph.D. Physical Chemistry, Northwestern Univ.</p>	<p>Multiscale simulations of biomolecular systems</p>	<p>Senior Fellow, Department of Genome Sciences, University of Washington-Seattle</p>
 <p><b>Dr. Ryan Martin</b> Ph.D. Biology, Univ. of North Carolina at Chapel Hill</p>	<p>Understanding the causes of phenotypic selection in the wild</p>	<p>Assistant Professor, Department of Biology, Case Western Reserve University</p>
 <p><b>Dr. Nick Matzke</b> Ph.D. Integrative Biology, UC Berkeley</p>	<p>Unification of phylogenetic biogeography and species distribution modeling</p>	<p>Discovery Early Career Researcher Award Fellow, Division of Ecology, Evolution, and Genetics, Research School of Biology, Australian National University</p>
 <p><b>Dr. Emily Moran</b> Ph.D. Biology, Duke Univ.</p>	<p>Community genetics and global change: scaling up genotype-level plant responses to population and community dynamics</p>	<p>Postdoctoral Researcher, Swiss Federal Institute of Technology (ETH) Zurich; Assistant Professor, Plant Ecology &amp; Evolution, University of California, Merced</p>
 <p><b>Dr. Calistus Ngonghala</b> Ph.D. Mathematics, West Virginia Univ.</p>	<p>A new model with vector demography for the dynamics of malaria transmission</p>	<p>Postdoctoral Fellow, Harvard School of Public Health; Research Fellow, Department of Global Health and Social Medicine, Harvard Medical School; Assistant Professor, Mathematical Biology, University of Florida</p>
 <p><b>Dr. Suzanne O'Regan</b> Ph.D. Applied Mathematics, Univ. College Cork</p>	<p>A mathematical framework for elucidating the impact of environmental drivers on the incidence of emerging and re-emerging pathogens</p>	<p>Assistant Professor, Department of Mathematics, North Carolina A&amp;T State University</p>
 <p><b>Dr. Angela Peace</b> Ph.D. Applied Mathematics, Arizona State Univ.</p>	<p>Stoichiometric food web models: How food quality affects population structures</p>	<p>Assistant Professor, Department of Mathematics and Statistics, Texas Tech University</p>

NIMBioS Postdoc	Project	Placement
 <p><b>Dr. Chris Remien</b> Ph.D. Mathematics, Univ. of Utah</p>	<p>How animal metabolism shapes isotopic signatures of trophic dynamics</p>	<p>Assistant Professor, Department of Mathematics, University of Idaho</p>
 <p><b>Dr. Megan Rúa</b> Ph.D. Environment &amp; Ecology, Univ. of North Carolina at Chapel Hill</p>	<p>Exploring the relative importance of biotic and abiotic sources of selection for mycorrhizal interactions</p>	<p>Assistant Professor, Department of Biological Sciences, Wright State University</p>
 <p><b>Dr. Daniel Ryan</b> Ph.D. Mathematics, Univ. of Miami</p>	<p>Investigating the effects of movement strategies on the population dynamics of multi-trophic ecological communities</p>	<p>Chief Information Officer, Mary Mahoney Enterprises</p>
 <p><b>Dr. Ioannis Sgouralis</b> Ph.D. Mathematics, Duke</p>	<p>Modeling dynamic renal autoregulation at the organ level</p>	<p>Postdoctoral Fellow, Indiana University – Purdue University Indianapolis; Postdoctoral Associate, Center for Biological Physics, Arizona State University</p>
 <p><b>Dr. Xavier Thibert-Plante</b> Ph.D. Mathematical Biology, McGill Univ.</p>	<p>Local adaptation and gene flow under climate change</p>	<p>Postdoctoral Fellow, Department of Ecology and Genetics, Uppsala University, Sweden; Senior Lecturer, Department of Ecology and Environmental Science, Umeå University</p>
 <p><b>Dr. Oyita Udiani</b> Ph.D Applied Mathematics for the Life &amp; Social Sciences, Arizona State Univ.</p>	<p>Learning in models of animal behavior: A novel game-theoretical approach</p>	<p>National Science Foundation Postdoctoral Fellow, University of Tennessee, Knoxville</p>
 <p><b>Dr. Matt Zefferman</b> Ph.D. Ecology, Univ. of California, Davis</p>	<p>The evolutionary origins of complex institutions</p>	<p>Postdoctoral Fellow, School of Human Evolution and Social Change, Arizona State University</p>
